

### ***Over the Water by Mags Chalcraft***

Over the water

Not under the thumb

North of the river

We beat our own drum

The past we remember

The future we'll share

Over the water

Come if you dare

We come forth from Norwich North we dance to our own beat

From the shawls upon our backs down to the shoes upon our feet

Our history's no mystery it's here it all began

They tell us we can't do it and we say yes we can

We're quick to speak we're never meek we'll always meet your eye

Thru thick and thin when times are grim our spirit will not die

Tho' life is hard down in our yard they'll never stop our song,

When they say bring it down, we say bring it on

### ***Anglia Square Verse and Chorus***

Our narrow streets are full of treats our shops are bright and bold  
From vintage frocks to bargain shops we always break the mould

Though money's tight we'll always fight to keep our way of life

They tell us it's all over, and we say we'll survive

Over the water

Not under the thumb

North of the river

We beat our own drum

All will be welcome

But meddlers beware

Over the water - Anglia Square!
